DETAILED ACTION

Claims 1, 9, 11, 20, 22-24, 30, 31, 33, 35, 36, 40 and 46-53 are currently pending in the instant application. Claims 11, 20, 30, 31, 33, 35, 36, 40 and 46-53 are withdrawn from consideration as being for non-elected subject matter. Claims 1, 23 and 24 are rejected. Claims 1, 9 and 22-24 are objected to as containing non-elected subject matter.

Election/Restrictions

Applicant's election of Group I and the further election of the species:

in the reply filed on 18 September 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

As per MPEP 803.02, the examiner will determine whether the entire scope of the claims is patentable. Applicants' elected species appears allowable. Therefore, the search has been extended to the non-elected species of 7-(2-tetrahydrofuryl)-xanthone-2-carboxylic acid which is not allowable. As this non-elected species has been found

not allowable, the Markush-type claims have been rejected and claims to the non-elected invention held withdrawn from further consideration.

Claims 1, 9 and 22-24 have been examined to the extent that they are readable

on the elected embodiment, the elected species of and the species 7-(2-tetrahydrofuryl)-xanthone-2-carboxylic acid. Since the non-elected species was found not allowable, subject matter not embraced by the elected embodiment is therefore withdrawn from further consideration.

It has been determined that the entire scope of claimed is not patentable.

Claim Objections

Claims 1, 9 and 22-24 are objected to as containing non-elected subject matter. Claims 1, 9 and 22-24 presented drawn solely to the elected embodiment would overcome this objection or an amendment to overcome the pending rejections in the instant application would overcome this objection as the search and examination of the claims according to MPEP 803.02 would continue.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 1 includes the phrase "a halide derivative thereof" in the definition of Rb. This phrase renders the claim indefinite as it is unclear what modifications are intended by the term "derivative". The term "derivative" is a compound, usually organic obtained from another compound by a simple chemical process or an organic compound containing a structural radical similar to that from which it is derived. Applicant has not provided what similar radicals are encompassed by the instant claims in regards to "a halide derivative thereof" which therefore renders the claims indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,835,158.

US Patent No. 3,835,158 discloses compounds of the formula (A) useful for the treatment of symptoms associated with allergic manifestations, such as asthmatic conditions (column 1, lines 5-20). Column 2, lines 40-50 disclose pharmaceutical compositions, including combinations with other compounds such as antibiotics. An example of a compound of the formula (A) is found in example 2 (3.), 7-(2-

tetrahydrofuryl)-xanthone-2-carboxylic acid, column 13, which corresponds to applicants' claimed invention wherein A is a 5 membered aliphatic ring containing 1 heteroatom of oxygen; n is 0; each Z is CR_b wherein R_b is hydrogen; X is O; m is 1; and R₁ is carboxyl. The antibiotic of column 2 corresponds to the antineoplastic agent required in claim 24, see page 27 of the instant specification wherein antibiotics are listed in chemotherapeutic agents.
